CONTENTS

J. Adem and M. Moshinsky: On matrix boundary value problems 424

H. A. Antosiewicz: A note on asymptotic stability 317

W. E. Arnoldi: The principle of minimized iterations in the solution of the matrix eigenvalue problem 17

R. Bellman: On an equation occurring in the harmonic analysis of viscous fluid flow 218

G. Birkhoff, M. Plesset, and N. Simmons: Wall effects in cavity flow—Part II . 413

T. M. Cherry: Relation between Bergman's and Chaplygin's methods of solving the hodograph equation 92

P. Cicala: The effect of initial deformations on the behavior of a cylindrical shell under axial compression 273

J. D. Cole: On a quasi-linear parabolic equation occurring in aerodynamics . . 225

S. D. Conte: The circular plate with eccentric hole 435

H. B. Curry: Note on iterations with convergence of higher degree 204

J. B. Diaz and R. C. Roberts: On the numerical solution of the Dirichlet problem for Laplace's equation 355

D. C. Drucker, W. Prager, and H. J. Greenberg: Extended limit design theorems for continuous media 381

A. Cemal Eringen: On the non-linear vibration of elastic bars 361

G. W. Evans: A note on the existence of a solution to a problem of Stefan . . 185

B. Garfinkel: Minimal problems in airplane performance 149

H. Geiringer: On the plane problem of a perfect plastic body 295

J. H. Giese: Compressible flows with degenerate hodographs 237

R. Gomory and D. E. Richmond: Boundaries for the limit cycle of van der Pol's equation 205

J. N. Goodier and H. J. Plass: Energy theorems and critical load approximations in the general theory of elastic stability 371

H. J. Greenberg (*see D. C. Drucker*)

G. A. Hufford: An integral equation approach to the problem of wave propagation over an irregular surface 391

E. Ikenberry: The conservation of systems in phase space 195

W. H. Ingram: A modification of Southwell's method 314

C. V. Klouček: Structural analysis by distribution of deformation 77

H. L. Knudsen: A note on a vector formula 431

James S. Kouvelites: Free longitudinal vibration of a prolate ellipsoid, clamped centrally 105

M. Z. Krzywoblocki: A note on my paper "On steady laminar two-dimensional jets . . ." 310

T. S. Kuhn: A convenient general solution of the confluent hypergeometric equation, analytic and numerical development 1

Ting-Yi Li (*see H. J. Stewart*)

Paul A. Libby and Howard R. Reiss: The design of two-dimensional contraction sections 95

C. C. Lin: A new variational principle for isenergetic flows 421

Chih-Bing Ling: On torsion of prisms with longitudinal holes 247

W. R. Mann and F. Wolf: Heat transfer between solids and gases under nonlinear boundary conditions 163

A. R. Manwell: A method of variation for flow problems 405

J. A. McFadden: Conformal mappings for certain doubly connected domains . 323

D. Middleton: On the distribution of energy in noise- and signal-modulated waves. I. Amplitude modulation 337

John W. Miles: The oscillating rectangular airfoil at supersonic speeds . . . 47

M. Moshinsky (*see J. Adem*)

Swami Dayal Nigam: Rotation of an infinite plane lamina: boundary layer growth: motion started impulsively from rest 89

F. K. G. Odqvist: An expansion of frequency determinants with application to the normal frequencies of a spring mounted rigid body 441

H. Ōkubo: The torsion and stretching of spiral rods 263

A. J. Owens and C. B. Smith: Effect of a rigid elliptic disk on the stress distribution in an orthotropic plate 329

H. J. Plass (*see J. N. Goodier*)

M. Plesset (*see G. Birkhoff*)

W. Prager (*see D. C. Drucker*)

C. R. Putnam: On the least eigenvalue of Hill's equation 310

R. M. Redheffer and R. Steinberg: The Laplacian and mean values 315

Howard R. Reiss (*see Paul A. Libby*)

D. E. Richmond (*see R. Gomory*)

R. C. Roberts (*see J. B. Diaz*)

W. R. Sears and H. S. Tan: The aerodynamics of supersonic biplanes 67

G. Seifert: A third order boundary value problem arising in aeroelastic wing theory 210

P. L. Sheng: Note on the torsional rigidity of semi-circular bars 309

N. Simmons (*see G. Birkhoff*)

C. B. Smith (*see A. J. Owens*)

R. Steinberg (*see R. M. Redheffer*)

H. J. Stewart and Ting-Yi Li: Source-superposition method of solution of a periodically oscillating wing at supersonic speeds 31

J. L. Synge: The fundamental theorem of electrical networks 113

J. L. Synge: Conditions satisfied by the expansion and vorticity of a viscous fluid in a fixed container 319

K. Tamada (*see S. Tomotika*)

H. S. Tan (*see W. R. Sears*)

S. Tomotika and K. Tamada: Studies on two-dimensional flows of compressible fluids—Part III 129

R. Turetsky: The least squares solution for a set of complex linear equations . . 108

F. H. van den Dungen: Note on the Hameo-Synge theorem 203

Chi-Teh Wang: A note on Bateman's variational principle for compressible fluid flow 99

Aurel Wintner: On a geometric method of deriving three-dimensional harmonic flows from two-dimensional ones 102

F. Wolf (*see W. R. Mann*)

Book Reviews 223, 333, 448
